DRESSME

Your Personal AI Fashion Assistant

An intelligent fashion ecosystem that transforms your wardrobe into a personalized digital experience using Artificial Intelligence, Computer Vision, and Recommendation Systems.

Your Wardrobe. Your Style. Your Intelligence.

01 / PROJECT VISION

Digitize your wardrobe. Understand your style. Discover outfits. Make smarter purchases.

01 Smart Digital Wardrobe

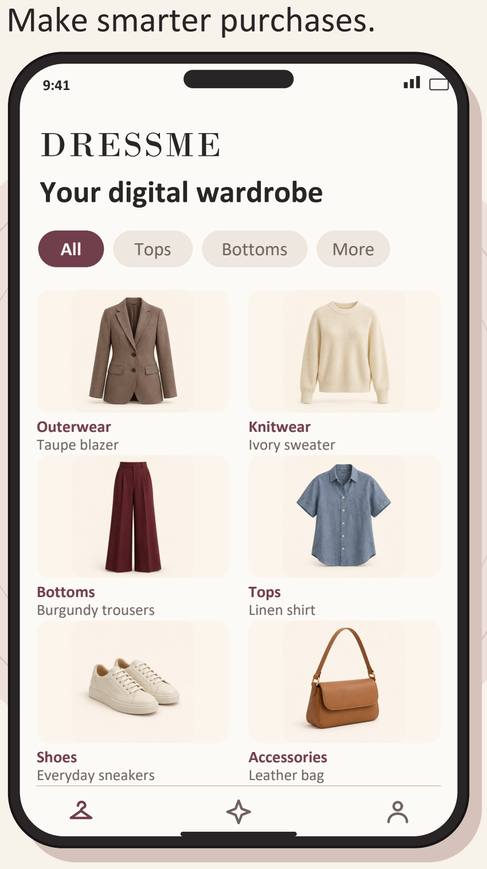

Upload clothing images and automatically organize your personal digital wardrobe.

02 AI Clothing Recognition

Identify clothing categories, colors, styles and visual characteristics with Computer Vision.

03 Personal Style Profiling

Learn individual preferences from clothing characteristics and user interactions.

ILLUSTRATIVE WARDROBE INTERFACE

04 Intelligent Outfit Recommendation

Generate personalized outfit combinations using pieces already in your wardrobe.

05 Smart Shopping Assistant

Evaluate potential purchases against your style and the clothes you already own.

06 Wardrobe Optimization

Find missing pieces, detect redundant items and improve wardrobe diversity.

07 Explainable Fashion AI

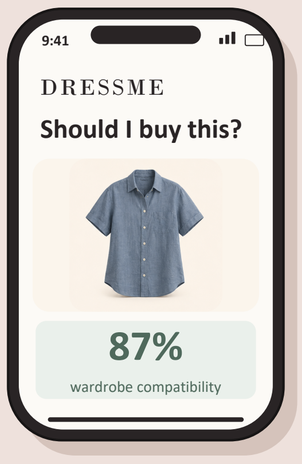

Clear explanations and compatibility scores reveal why each recommendation fits your wardrobe.

02 / HOW DOES DRESSME WORK?

01	02	03	04	05
USER INPUT	**COMPUTER VISION**	**PERSONALIZATION**	**RECOMMENDATION ENGINE**	**INTELLIGENT FASHION ADVICE**
Clothing images + user interactions	Clothing recognition + feature extraction	Style profiling + preference modeling	Outfit generation, matching + wardrobe optimization	Personalized outfits + shopping decisions

03 / AN INNOVATIVE FEATURE

Should I buy this?

RECOMMENDED PURCHASE

This item matches your style and combines with several pieces in your wardrobe.

THINK TWICE

You already own similar items. This purchase adds limited value to your wardrobe.

NOT RECOMMENDED

This item has low compatibility with your current wardrobe.

Illustrative UI example. The score is not a measured project result.

AI METHODS

Powered by Data Science & Artificial Intelligence

- Computer Vision
- Convolutional Neural Networks (CNN)
- Deep Learning
- Recommendation Systems
- Collaborative Filtering
- Preference Modeling
- Multimodal AI
- Explainable AI
- Generative AI

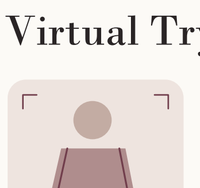

04 / INNOVATION & IMPACT

Beyond Fashion:
Smarter & More Sustainable Choices

- Personalized fashion experiences
- Better wardrobe utilization
- More sustainable consumption habits
- Fewer unnecessary purchases
- Budget-conscious shopping
- Tunisian fashion preferences & seasons

OPTIONAL EXTENSION

Virtual Try-On

Visualize an outfit through a virtual fitting interface.

Future perspective
